
MEETING OF THE BIOLOGICAL CLUB.

ORTON HALL, Jan. 15, 1906.

The Club was called to order by the President, Mr. Griggs. The minutes of the last meeting were read and approved.

Mr. Herms presented the paper of the evening. He gave the results of his work carried on at Cedar Point.

Prof. Osborn reported the meeting of the A. A. A. S. which was held at New Orleans. He reported especially the papers that were presented on Yellow Fever and the Boll Weevil.

Mr. Cotton talked very interestingly of the papers read before the section of Economic Entomologists.

Mr. Griggs reported his work on *Ascaris*. It has been held that there was a double longitudinal splitting of the chromosomes, but Mr. Griggs has shown that it is a single longitudinal split, a folding and a transverse split which gives the appearance of a double longitudinal split.

The Club then adjourned until February.

Z. P. METCALF, *Secretary*.
